LOGAN ANCELL

GAMEPLAY DESIGNER | CREATURE SYSTEMS | GAMEPLAY PROGRAMMING

Pahrump, NV | (702) 445-9907 | business@duckiegames.com

Portfolio: itzpvlmz.github.io | **GitHub: github.com/itzpvlmz**

PROFESSIONAL SUMMARY

Game Development B.S. student and independent developer focused on creature gameplay, systems design, progression, ecological worldbuilding, and player interaction. Creator of BOXELS, an original creature-focused project with 100+ creatures designed around behavior, abilities, habitats, temperaments, diets, rarity, and ecological roles. Hands-on C++ experience building playable gameplay systems, data-driven creature structures, UI flows, save/progression systems, and iterative prototypes.

GAME DEVELOPMENT SKILLS

GAMEPLAY & DESIGN	PROGRAMMING	TOOLS & WORKFLOW
Creature Design & Behavior	C++	Visual Studio
Gameplay & Progression Systems	Object-Oriented Programming	Git & GitHub
Combat / Non-Combat Interaction	Data-Driven Systems	Godot 4
Ecological Worldbuilding	Gameplay Programming	AI-Assisted Development & Prompting
UI/UX • Storyboarding	Debugging & Iteration	Visual Planning & Documentation

SELECTED GAME DEVELOPMENT

BOXELS | Creator / Gameplay Designer / Programmer — **2026 – Present**

- Design 100+ original creatures with distinct temperaments, behaviors, diets, habitats, abilities, statistics, move sets, rarity, and ecological roles.
- Design combat and non-combat interactions including fleeing, territorial behavior, herd protection, predation, environmental adaptation, and player research.
- Develop interconnected regions, creature populations, progression requirements, gameplay concepts, storyboards, and systemic worldbuilding.

BOXELS — EchoDex Research Prototype | Gameplay Designer / C++ Programmer — **2026 – Present**

- Built a playable C++ research-terminal prototype centered on creature discovery, research progression, and player interaction.
- Implemented structured creature data, research levels, researcher upgrades, region unlocking, multiple save profiles, keyboard navigation, confirmation/warning states, audio cues, and visual feedback.
- Repeatedly tested and refined UI hierarchy, navigation, research timing, save/load flows, and reusable data-driven systems.

Duckie Games | Founder / Independent Game Developer — **2026 – Present**

- Develop original game concepts from design and worldbuilding through playable prototypes, working across gameplay programming, systems, UI/UX, narrative planning, audio coordination, and player experience.

EDUCATION

Full Sail University — B.S., Game Development (In Progress) — **Jan 2026 – Present**

Relevant study: C++, object-oriented programming, systems programming, gameplay systems, version control, debugging, and game development workflows.

PROFESSIONAL BACKGROUND

Allied Universal — Security Officer, Hospital (Jun 2026–Present) • **Nye County Sheriff's Office** — Detention Deputy (Dec 2024–Nov 2025)

CoreCivic — Detention Officer (Oct 2020–Feb 2024) • **Rent-A-Center** — Credit/Sales Manager (Sep 2015–Oct 2020)

Additional: St. Moritz Security Services — Armed Security Officer (Mar 2024–Oct 2024). Transferable strengths include cross-functional collaboration, leadership, documentation, adaptability, conflict resolution, and sound judgment in fast-paced environments.
